23 Nov 66 2100Z		Colorado Springs, Colorado (1 witness)	
3. SOURCE		10. CONCLUSION	
Civilian		INSUFFICIENT DATA FOR EVALUATION Photo: SMALL MAN MADE object Photo does not support the submitted description of the object.	
4. NUMBER OF OBJECTS		11. BRIEF SUMMARY AND ANALYSIS	
One			
5. LENGTH OF OBSERVATION			
45 minutes			
6. TYPE OF OBSERVATION			
Ground Visual		Observer noted a silver colored object about 25 feet in diameter maneuver above the ground to the right and left; back and forth, with slight changes in elevation. Observer viewed the object the next night and took photographs. Photo analysis revealed a probable diameter at between one and two feet. It appears that the object observed, if any, was not photographed.

9. PHYSICAL EVIDENCE			
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No			

Photo #7 - Same as #6 but shadows didn't appear.

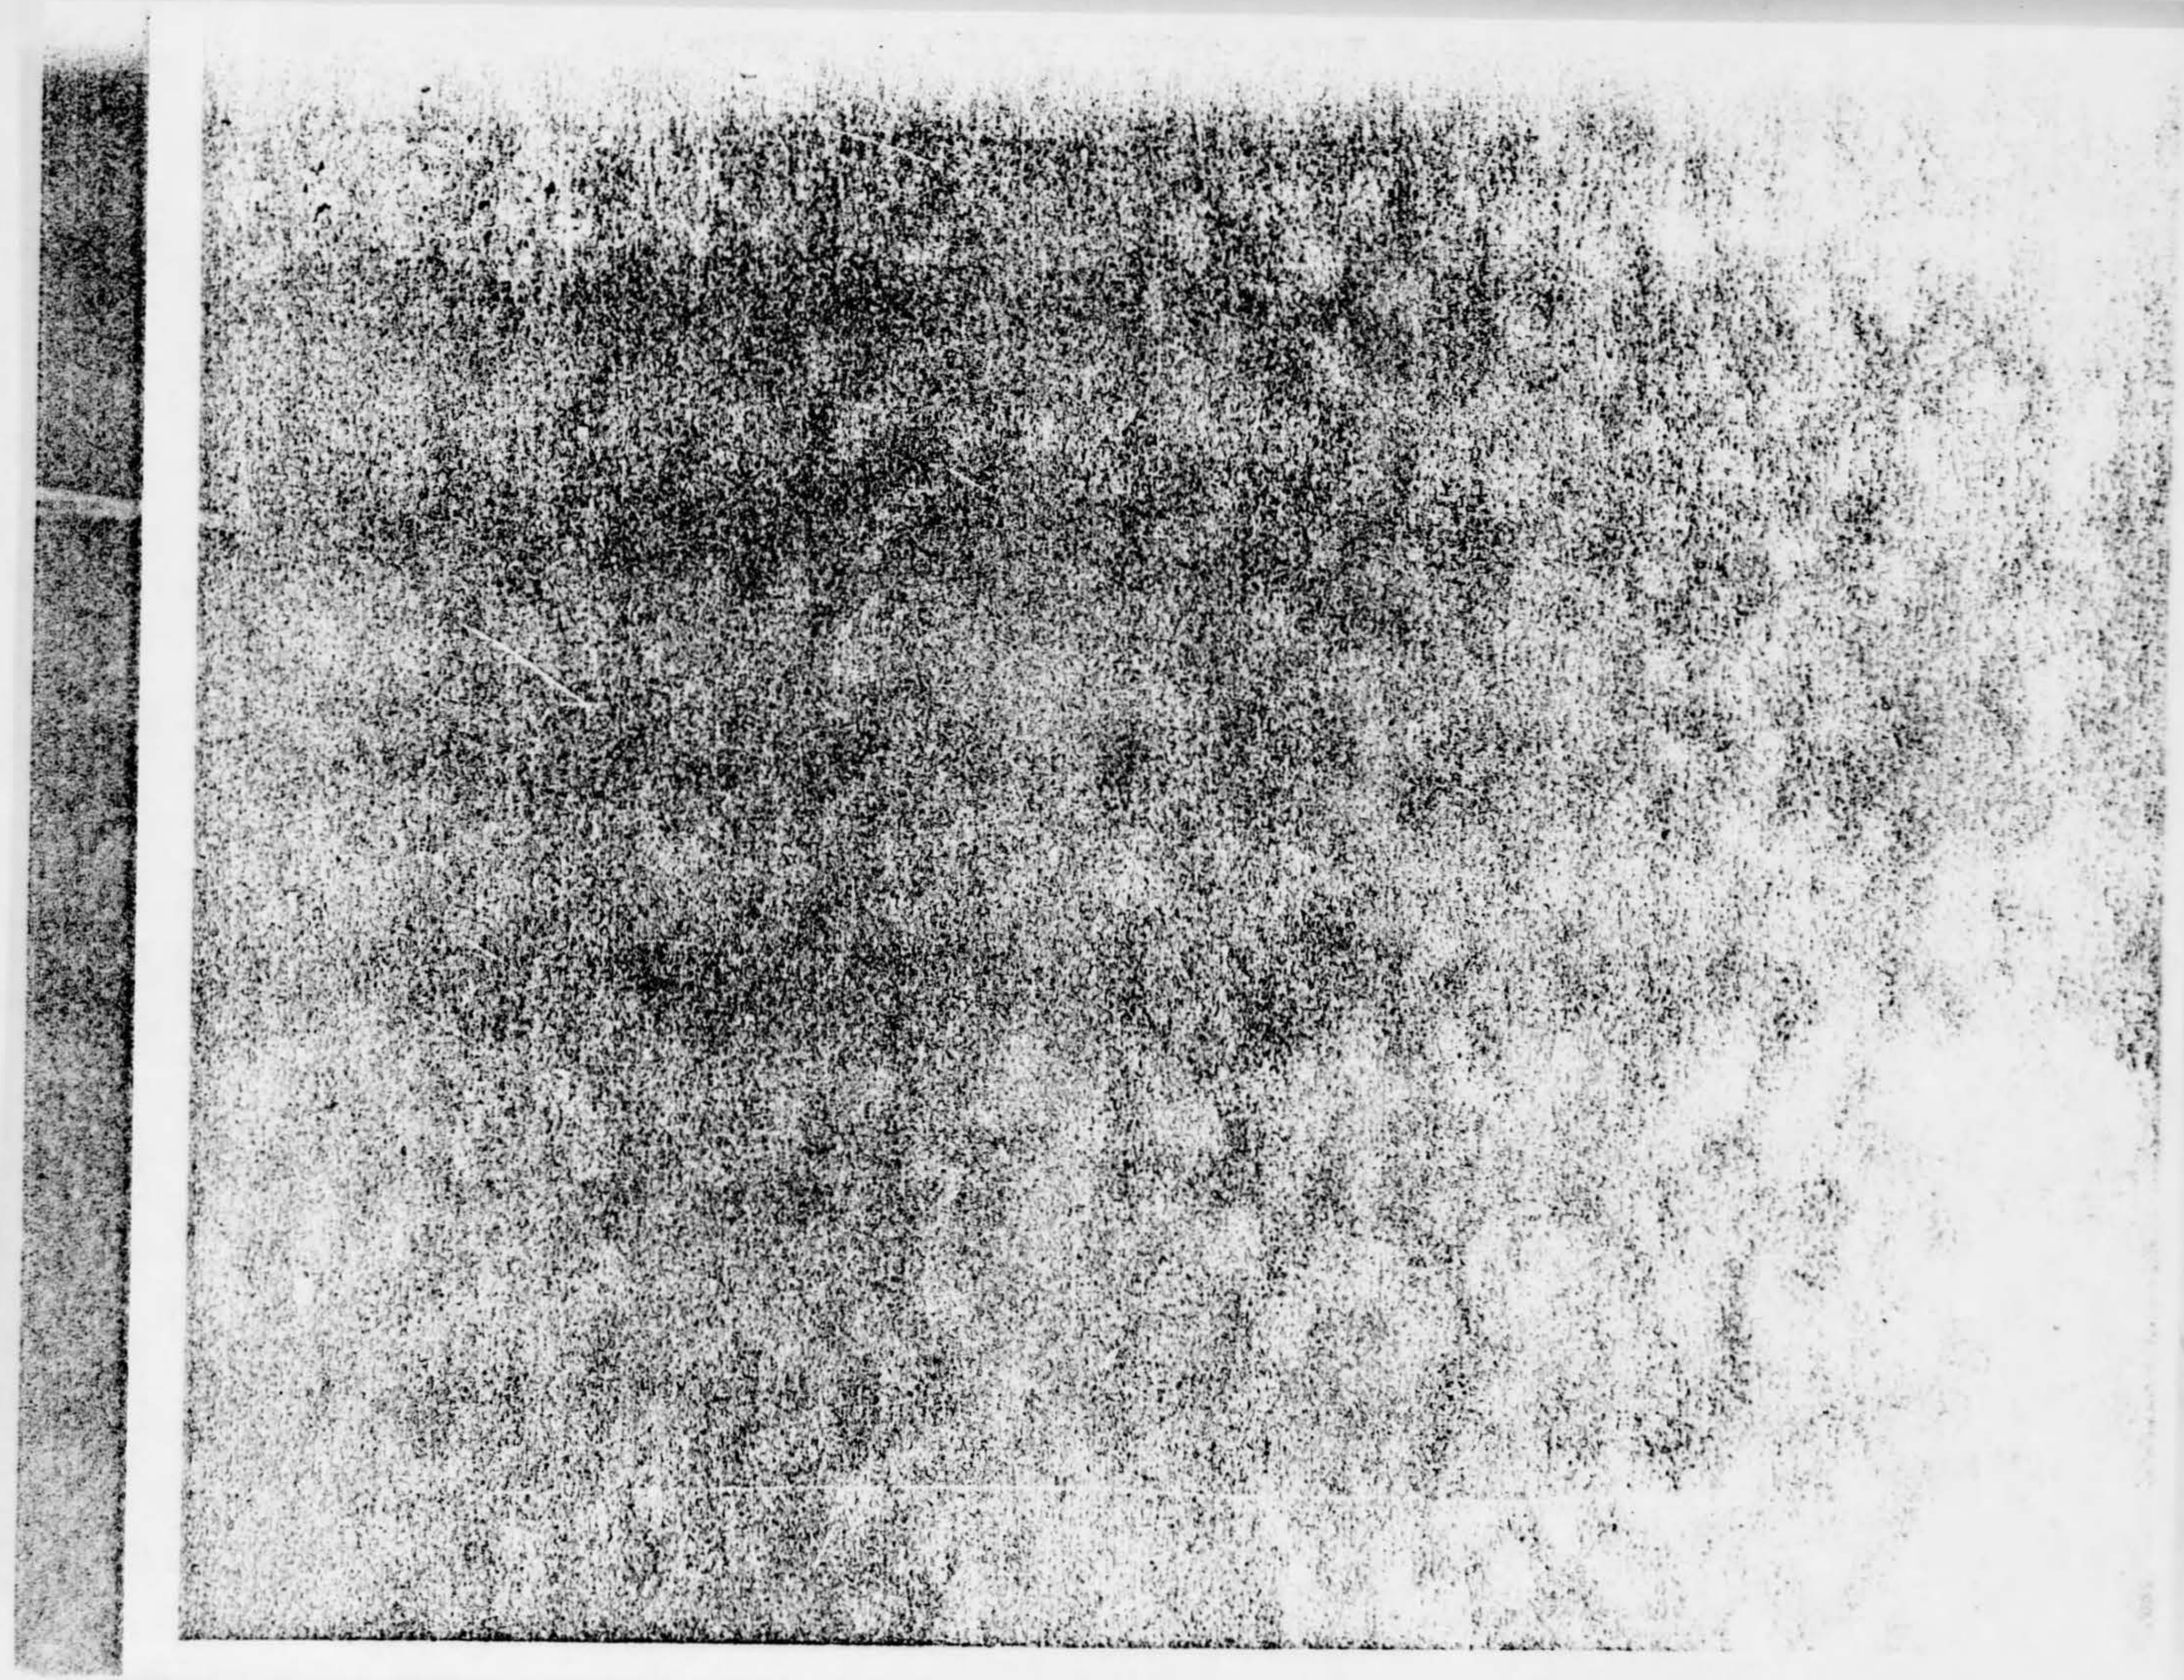

Photo #6 - Elevated shot at night of the area.

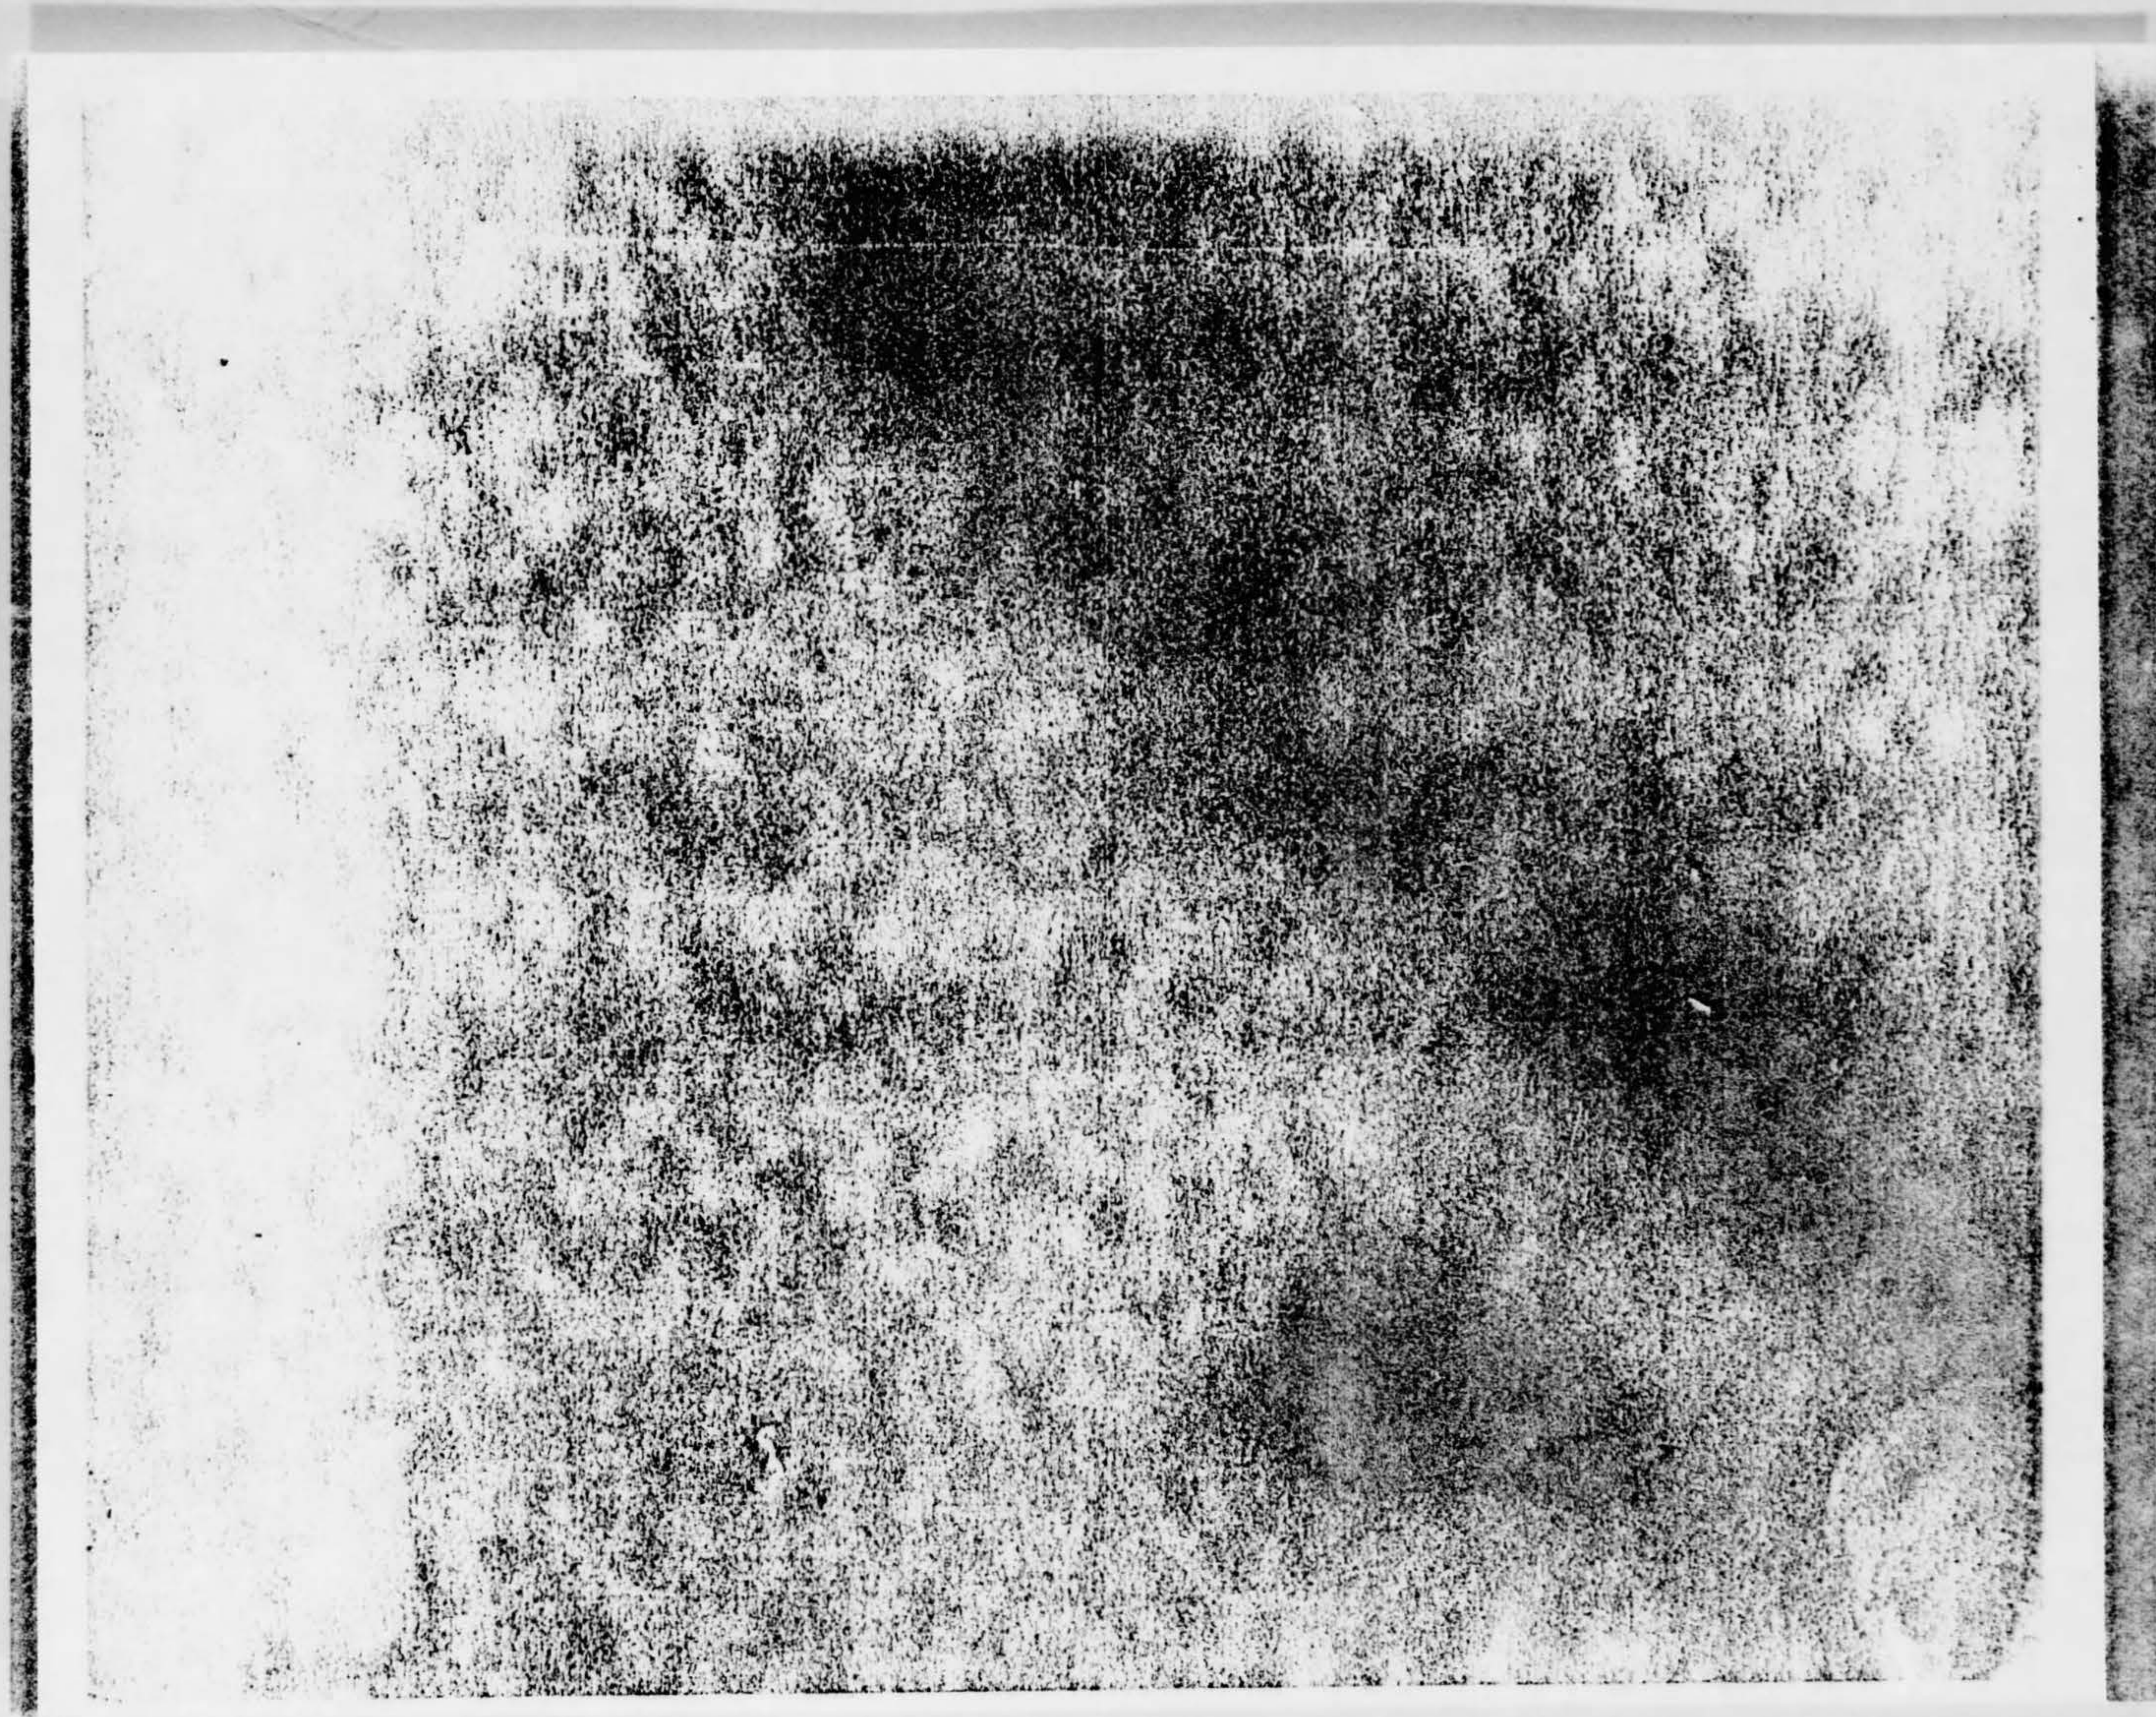

Photo #3 - Moments later, walked toward the area of noise
and took this picture.

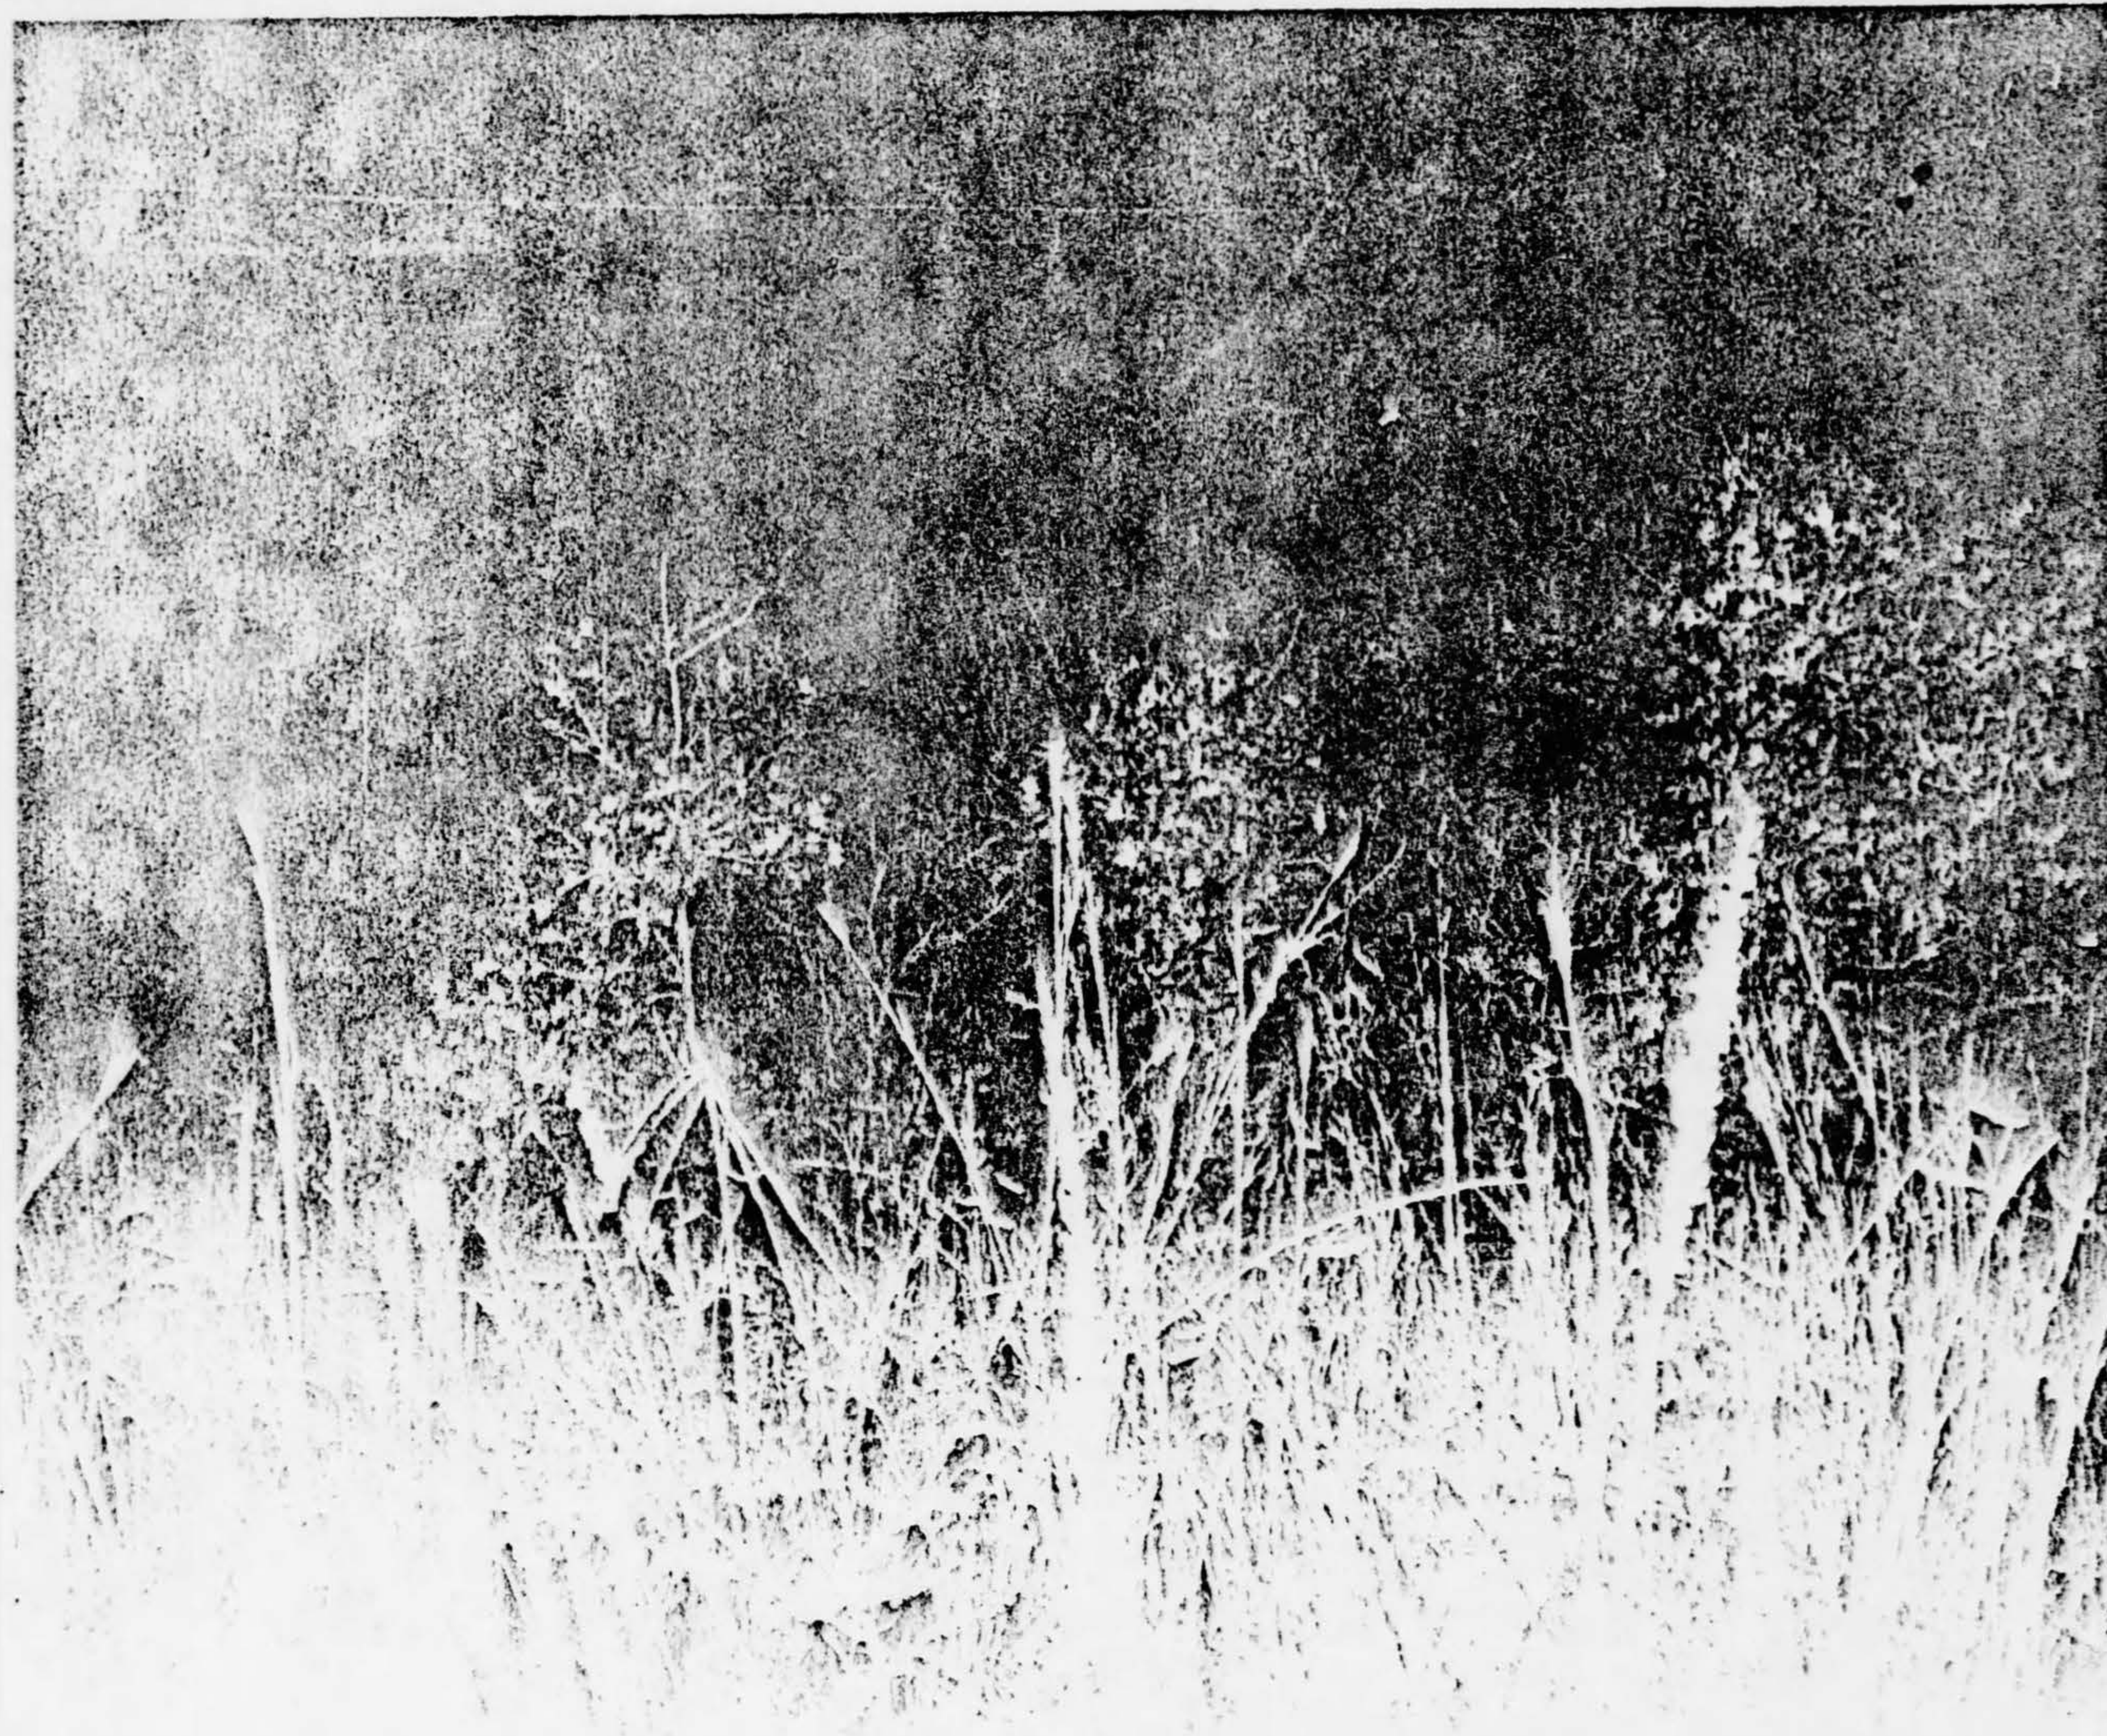

Photo #4 - Next day. General shot of area where pictures
1, 2 and 3 were taken.

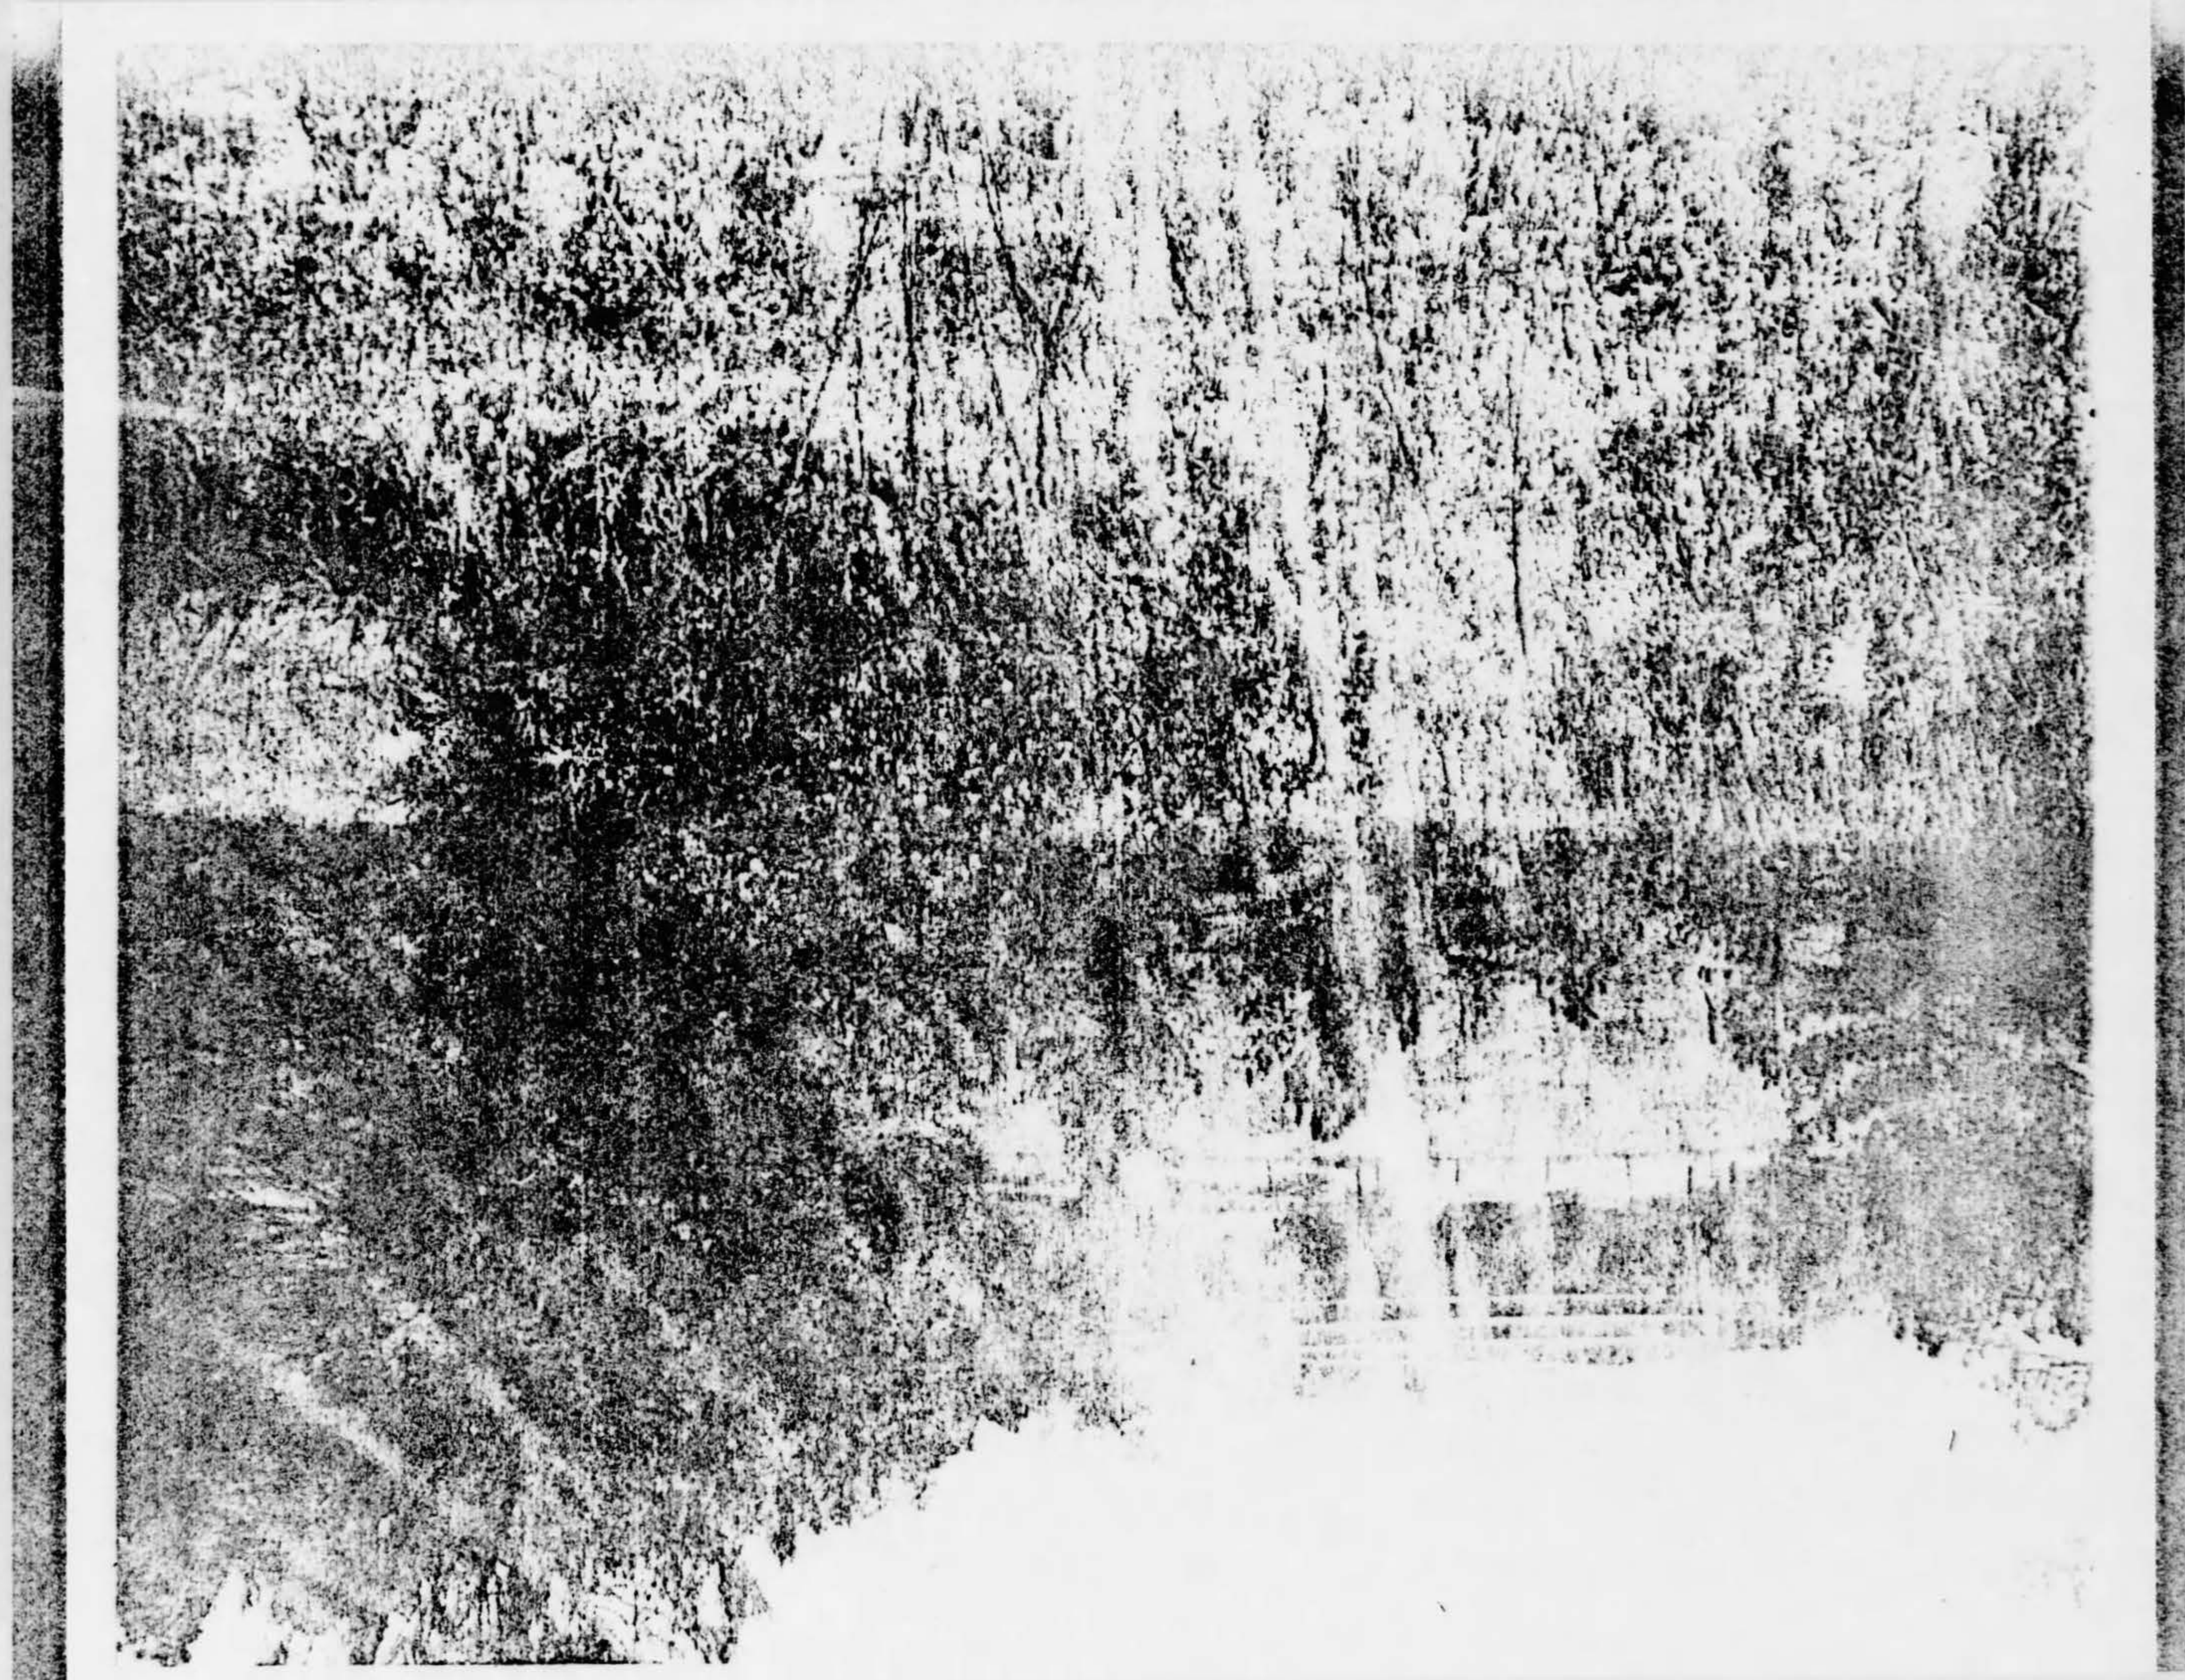

Photo #5 - Close up of area where sighting occurred. Fence
same as in Picture #4.

DATE OF REPORT 15 March 1966

SUBJECT UNIDENTIFIED FLYING OBJECT

LOCATION Colorado Springs, Colorado

DATE November 1966

PHOTOGRAPHY

AF _____ IR _____ QUALITY Fair

P NRS 7 polaroid prints (B&W)

1. PURPOSE: This report is in reply to a request submitted by Major Quintanilla (TDETR) to determine the identity of the object photographed.

2. ANALYSIS: Examination of the seven submitted polaroid-type prints has negated double exposure and/or retouching; the photography appears genuine insofar as content is concerned. The object, which appears only on photos one and two, was photographed at night using a flash attachment. The camera focal length was apparently set for close range as is evidenced by the relatively high degree of detail in the foreground. Source indicated that the object was circular with a domed top and flat bottom having a diameter of 20 to 25 feet. The object photographed has the appearance of a "crushed" or "squashed" cylinder and exhibits a fairly high degree of detail and reflectivity as is indicated by the reflection of the flash attachment. By computing the camera focal length versus the size of the object as it appears in the photography, it would have to be positioned at least 300 feet from the camera lens. At this distance the flash attachment would not illuminate the object. The object appears to be located on the ground and immediately beyond the perimeter of light emitted by the flash attachment. The exact size of the object is not known but its apparent distance from the camera lens indicates the diameter is likely to be between 1 and 2 feet.

MAY 1 1967

Dear Mr. [REDACTED]

Reference your recent unidentified flying object report. Photo analysis of the submitted photograph revealed the following:

The object which appears only on photos one and two, was photographed at night using a flash attachment. The camera focal length was apparently set for close range as is evidenced by the relatively high degree of detail in the foreground. Source indicated that the object was circular with a domed top and flat bottom having a diameter of 20 to 25 feet. The object photographed has the appearance of a "crushed" or "squashed" cylinder and exhibits a fairly high degree of detail and reflectivity as is indicated by the reflection of the flash attachment. By computing the camera focal length versus the size of the object as it appeared in the photograph, it would have to be positioned at least 300 feet from the camera lens. At this distance the flash attachment would not illuminate the object. The object appears to be located on the ground and immediately beyond the perimeter of light emitted by the flash attachment. The exact size of the object is not known but its apparent distance from the camera lens indicates the diameter is likely to be between one and two feet.

The photographs do not support the submitted description of the object. It appears that the object observed, if any, was not photographed.

Thank you for reporting your observation to the Air Force. Your six negatives are inclosed.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch
